Labelmaster

SLIDEMASTER™

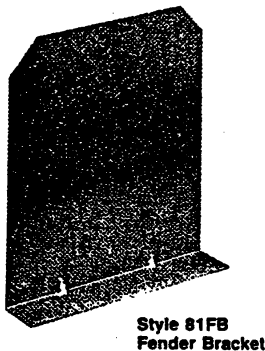

SLIDEMASTER™ FRAME

This affordable, slide-in placard holder with riveted assembly meets Labelmaster's exacting standards for quality construction. The Slidemaster Frame is available in .032 Anodized Aluminum (Style 80SM or 80SM/S split frame), and in .030 304-2B Stainless Steel (Style 80SS) for maximum strength and durability. All styles have a built-in, heavy-duty stainless steel clip. Accommodates non-adhesive placards in tagboard and rigid vinyl.

Placarding Accessories

PLACARD HOLDER SHIELD

Sturdy .03 mil thick extruded plastic shield helps protect placards from falling or blowing out of their holders...also helps to retard deterioration. Rounded corners; measures 10¾" x 10¾".

DUO-FLIP™ PLACARDING SYSTEMS

**Change Both PLACARDS and ID NUMBERS
In Seconds...with the Innovative, Versatile
DUO-FLIP™ System**

Approved for use by either private or common carriers, Duo-Flip is the perfect solution for compliance with 49CFR 172.332. In the tradition of Spacemaster, this innovative, versatile placarding system offers the total flexibility needed to comply with regulations. You can flip in seconds to achieve any possible combination of ID Numbers, then flip again to display the corresponding placard. The self-contained placards slide over easily on four (4) aluminum hinges; each number flips on two (2) stainless steel hinges. Then, lock your panel in securely with the four (4) stainless steel, double-riveted fasteners. Our exclusive deep-formed, heavy-duty aluminum frame is designed to provide stability and good wind protection for the aluminum panels. Legends are silkscreened in D.O.T. colors, using UV inks that resist chipping and peeling.

**Designed for
Maximum Flexibility...
Engineered for
Tough Highway
Performance**
